Tiny Bubbles

When you're thinking about pairing, don't forget about Champagne! The natural brisk acidity and lack of tannin are perfect for cleansing your palate.

Like what you're drinking?

Take a bottle to go, and we'll waive the corkage on your in-house purchase.

The first Champagnes of France were created by mistake. Secondary fermentation in the bottle trapped carbonation, causing corks to pop and bottles to explode. These faulty bottles earned the nickname 'devil's wine', until some realized the taste was quite pleasant. In 1884 Jaquesson invented the 'muselet' to keep the corks in place, once and for all.

Butter + OAK

What makes some chardonnay taste "oaky and buttery"? Oak aging makes chardonnay smell of vanilla, coconut, and baking spices. The "buttery" aroma and texture come from a winemaking method called malolactic fermentation, a process that transforms harsh malic acid (the acid in apples) into smooth lactic acid (the acid in milk).

ON THE FENCE
BETWEEN
WHITE AND RED?

Go orange!

'Orange Wines' are white wines produced like reds, where the grape skins are left to macerate with the juice, extracting tannin and color. They stand up to richer foods, yet remain elegant and refreshing.

Like this?

TRY THIS!

Like Pinot Grigio? Try Gruner Veltliner! Crisp, peppery and herbal, and incredibly versatile with food.

TREND SETTING

Chenin Blanc used to be a staple in Napa Valley. Until 1996, Charles Krug, for one, used to make more than 100,000 cases a year of inexpensive, slightly sweet Chenin Blanc. Most of those Napa vines were removed in favor of Sauvignon Blanc and Cabernet Sauvignon.

ACID + TANNIN

Defining a wine as 'crisp' means highlighting its high acidity level. Acidity (or tartness) in wine pairs well with fatty or slightly sweet foods. The acidity of your wine should match or exceed that of your meal, so your wine doesn't end up tasting flat or "flabby" (if the acidity is too low).

Why Decant?

For older wines, the decanter is used to separate liquid from sediment. With younger, big and bold wines like Cabernet, Nebbiolo or Syrah, extra oxygenation from decanting helps the wine to reveal more aromas, and softens harsh tannins.
